

Manage your risk with intelligence-driven solutions.

Verizon Security Services

Are you prepared to combat the speed and sophistication of would-be attackers? As one of the world's leaders in security, we can help you recognize cyber-attack trends and prepare you to respond quickly to threats. With better security intelligence and decades of experience, we can help defend the perimeter, monitor and manage your infrastructure, and offer emergency breach response and security consulting.

- More than 20 years of security experience
- Publisher of the annual *Data Breach Investigations Report*, an unparalleled source of security insight
- Nine Security Operations Centers (SOCs) across the globe
- Insight into a considerable amount of the world's IP traffic
- Positioned as a leader in the 2015 Gartner Magic Quadrant for Managed Security Services, Worldwide¹

DDoS Shield

Attack mitigation

Deploy highly scalable, carrier-agnostic distributed denial-of-service (DDoS) protection.

Network Threat Monitoring/Network Threat Advanced Analytics

Visibility of potential threats

Visualize threats and understand their causes.

Managed Security Services

Intelligence-driven risk management

Reduce risk and respond to threats quickly with advanced security analytics and log monitoring and management.

Unified Security Services

Network-edge protection

Protect your network edge with leading technology and expertise from our managed security analysts.

Advanced Security Operations Services

Holistic, intelligent analytics across multiple elements

Build customized security operations center (SOC) solutions that meet complex requirements.

Cyber Risk Programs

Data-driven risk analysis

Understand and control your risk by focusing on your most critical and vulnerable assets.

1. Gartner, *Magic Quadrant for Managed Security Services, Worldwide*, Kelly Kavanagh and Toby Bussa, December 2015

Delivering real solutions for better business outcomes.

Verizon Professional Services

We bring together extensive data investigation and protection experience and one of the world's largest teams of Payment Card Industry (PCI) Qualified Security Assessors (QSAs) to help you keep your most critical assets secure.

- Seven forensics labs on four continents
- More than a decade of forensics investigations
- One of the largest teams of PCI Qualified Security Assessors in the world, serving more than 30 countries
- Managing data protection implementations for companies from 400 to 450k users
- Sixty-one billion security events analyzed, on average, each year

Threat and Vulnerability Management

Detect complex vulnerabilities in your applications and business infrastructure that scanning tools alone can't discover. We offer flexible and customizable solutions, including automated baseline scanning tools, secure application development and holistic application security services.

Penetration testing | Secure development | Network security | Threat programs | CERT

Governance, Risk and Compliance

Keep your security programs operating in a way that meets your needs while addressing compliance with government regulations and industry standards.

Baseline Security Assessment | HIPAA | Information Assurance Management Action Plans | SANS Top 20

Payment Card Industry

Take a holistic approach to cardholder data security, risk and compliance with our comprehensive suite of PCI-related solutions and PCI QSAs.

PCI audits | PCI consulting | Program Management | Payment security | PCI DSS

Identity and Access Management

Authenticate and manage users across your organization's physical, mobile and cloud-computing environments, and provide secure access to enterprise resources from virtually any location or device.

IAM Governance | PKI Assessments and Integration | IAM Maturity and Roadmap

Data Protection

Classify, monitor and protect data when at rest, in motion or in use – both inside and outside your enterprise.

Data Discovery and Classification | Data Leak Prevention | DLP Policy

RISK – Investigative Response

Improve your reaction time to even the most sophisticated attacks with the help of our Research, Investigations, Solutions and Knowledge (RISK) Team. We can help you identify the source, contain it and verify the extent of losses – all to limit the impact to your organization and your customers.

Rapid Response Retainer | eDiscovery | Critical Infrastructure Protection | RISK Labs
