

MS-ISAC[®]

Multi-State Information
Sharing & Analysis Center[®]

What is the Nationwide Cyber Security Review?

The Nationwide Cyber Security Review (NCSR) is a no-cost, anonymous, annual self-assessment designed to measure gaps and capabilities of state, local, tribal and territorial governments' cybersecurity programs. It is based on the National Institute of Standards and Technology Cybersecurity Framework (NIST CSF), is sponsored by the Department of Homeland Security (DHS) & the Multi-State Information Sharing and Analysis Center[®] (MS-ISAC[®]), and in partnership with the National Association of State Chief Information Officers (NASCIO) & the National Association of Counties (NACo).

2017 Participation by Entity Type:

476
SLTT entities

45
states

129
local

5

tribes

297

state agencies

By participating in the NCSR you will:

- Utilize the NCSR to fulfill your justification requirement for cybersecurity investments under the Homeland Security Grant Program
- Receive metrics specific to your organization
- Use the metrics provided to identify gaps in your security program
- Anonymously measure your results against peers
- Be a part of the ongoing effort to chart national cybersecurity maturity & identify areas of concern
- Access to informative references such as NIST 800-53, COBIT, and the CIS Controls that can assist in managing cybersecurity risk
- For HIPAA compliant agencies, translates your NCSR scores to the HIPAA Security Rule scores for an automatic self-assessment tool
- Develop a benchmark to gauge year-to-year progress

Note: National Institute of Standards and Technology Cybersecurity Framework (NIST CSF) list the NCSR as a risk management resource for SLTTs
